ACTA Question Bank

Official Answers, Risk Register & Pitch Defense Guide

Comprehensive, grounded, and non-hallucinated defense manual for the Bharat Udyam Sangam 2026 Conclave at GLBCRI (GL Bajaj Center for Research and Incubation). Contains factual answers for all 160 examination questions, 14 operational scenarios, risk registers, and pitch readiness checklists. Fully synchronized with PRD v2.6 Revised.

160 Questions Answered | SaaS & 5% Service Fee Clarified | ₹100 Split Math (₹5 / ₹95) | Continuity Reserve Policy | 1 Campus + 1-2 Local NGOs Pilot | Collegiate Impact Guilds & Campus Clans

FOUNDER & PITCHER Piyush Singh (CEO, Resence)	ACADEMIC STANDING BCA 2nd Year, GL Bajaj (GLBIM)	TARGET CONCLAVE Bharat Udyam Sangam 2026 (GLBCRI)
DOCUMENT CLASSIFICATION Official Pitch Defense Guide v2.6	TAGLINE LOCKED Small Acts. Big Impact.	LIVE PROTOTYPE resence.in / acta.resence.in

Question Bank, Suggested Answer Frameworks, Risk Register and Pitch Checklist

Tagline: Small Acts. Big Impact.

Use this as a preparation document. Adapt every answer to the current product. Clearly distinguish implemented features from planned features and hypotheses from validated facts.

1. Most Important Questions — Suggested Answers

QUESTION 1

What is ACTA?

ACTA by Resence is a social-impact technology platform designed to connect people, communities, institutions, NGOs and resources to help solve societal problems collaboratively.

STRATEGIC DEFENSE

QUESTION 2

What problem are you solving?

Social-impact activities can suffer from disconnected volunteers, institutions, NGOs and resources, along with limited coordination and visibility into progress. ACTA aims to bring these workflows together.

STRATEGIC DEFENSE

QUESTION 3

How is ACTA different?

ACTA's proposed differentiation is its connected workflow: challenge discovery, Institutional Guilds, volunteering, resource coordination, evidence-based progress and impact tracking. This needs validation against competitors and through a pilot.

STRATEGIC DEFENSE

QUESTION 4

What have you built?

I have developed and deployed a full-stack prototype. I will demonstrate features that currently work and distinguish them from planned features.

LIVE PROTOTYPE STATUS

QUESTION 5

How will ACTA make money?

The proposed model is to provide software, campaign-management and reporting services to NGOs or institutions and charge an agreed service fee or subscription. ACTA operates as a Technology-as-a-Service (SaaS) provider. ACTA earns a proposed 5% platform service fee for software infrastructure, verification telemetry, and donor reporting. Earmarked 20% of fee revenue supports an internal Continuity Reserve for platform stability and emergency replacement execution.

PROPOSED ARCHITECTURE (PENDING REVIEW)

QUESTION 6

Where will donations go?

Under the proposed model, donations will go directly to an eligible NGO's payment account. ACTA's service fee may be handled through a configured provider settlement arrangement, subject to confirmation and compliance review. Canonical proposed allocation for ₹100: ACTA service fee = ₹5.00 (5%); NGO payout = ₹95.00 (95%). Of the NGO's ₹95, up to 10% (₹9.50) may be used for permitted audited logistics if allowed by terms/restrictions, and remaining 90% (₹85.50) is dedicated to direct cause supplies backed by GST invoices. Labeled as proposed accounting illustration.

STRATEGIC DEFENSE

QUESTION 7

Who are your first users?

The initial target could be one college or institution, its student community and one suitable NGO partner. The pilot will test user needs and adoption.

STRATEGIC DEFENSE

QUESTION 8

What do you need from GLBCRI?

Incubation support, mentorship, introductions to institutional and NGO partners, market validation and guidance on a compliant payment model.

GROUNDED PILOT EXECUTION

QUESTION 9

What is your biggest risk?

Proving real-world adoption and willingness to pay, securing NGO partnerships, making evidence verification reliable and implementing a compliant payment flow.

STRATEGIC DEFENSE

QUESTION 10

What will you do in 90 days?

Define a focused pilot, work to onboard an institution and NGO partner, test the core workflow, and measure participation, completed activities, evidence acceptance and partner feedback.

GROUNDED PILOT EXECUTION

2. Founder and Idea Origin

QUESTION 11

How did ACTA begin?

The idea began with my efforts to recruit volunteers for social-impact activities. Over time, I saw an opportunity to connect volunteers, communities, institutions, NGOs and resources through a coordinated system.

STRATEGIC DEFENSE

QUESTION 12

How did you move from volunteer recruitment to a platform?

I started with volunteer recruitment, then explored how the process could be organized and scaled. The broader features evolved over time rather than being part of the original idea.

STRATEGIC DEFENSE

QUESTION 13

Have you experienced this problem?

My initial experience recruiting volunteers motivated me to explore how social-impact participation could be coordinated more effectively.

STRATEGIC DEFENSE

QUESTION 14

What do ACTA and its tagline represent?

ACTA by Resence uses the tagline “Small Acts. Big Impact.” It reflects the idea that coordinated individual contributions can support broader social outcomes.

STRATEGIC DEFENSE

QUESTION 15

How much time have you invested?

I have spent roughly a year evolving the concept and working on the prototype and validation activities. I can explain the milestones and work completed.

STRATEGIC DEFENSE

QUESTION 16

Who is on your team?

I will explain each member’s actual responsibilities, skills and contribution, without assigning roles that we have not agreed on.

STRATEGIC DEFENSE

QUESTION 17

Why should people join your team?

The opportunity is to work on a meaningful social-impact problem, build a real product and test it with actual communities and NGO partners.

STRATEGIC DEFENSE

QUESTION 18

What if college exams conflict with the startup?

I will set a realistic schedule, define responsibilities and establish measurable weekly goals.

STRATEGIC DEFENSE

QUESTION 19

What if a team member leaves?

We will document the product, maintain version control and define ownership and responsibilities so work can continue.

STRATEGIC DEFENSE

QUESTION 20

What are your strengths and gaps?

I have taken the idea from volunteer recruitment to a deployed prototype. I still need to strengthen validation, operations, compliance and scaling, and I am seeking mentorship for those gaps.

STRATEGIC DEFENSE

3. Problem and Market Validation

QUESTION 21

Who are your target users?

Potential users include volunteers, students, institutions and NGO teams. Potential paying customers may include NGOs or institutions, depending on pilot results.

STRATEGIC DEFENSE

QUESTION 22

What evidence supports the problem?

My experience and outreach motivated the concept. I will present actual interview findings, survey results or partner feedback where available, without overstating the evidence.

STRATEGIC DEFENSE

QUESTION 23

Have you interviewed users?

I have reached out to NGOs for feedback. I will distinguish the number contacted from the number who replied and the insights actually received.

STRATEGIC DEFENSE

QUESTION 24

What did NGO outreach teach you?

I will share actual responses and recurring pain points documented during outreach, without claiming a consensus unless the feedback supports it.

STRATEGIC DEFENSE

QUESTION 25

Has an NGO formally agreed to use ACTA?

I will state the current status accurately. Outreach or a positive conversation is not the same as a signed pilot agreement.

STRATEGIC DEFENSE

QUESTION 26

Has an institution committed to a pilot?

I will state whether a formal commitment exists. If not, securing a pilot partner is a next milestone.

GROUNDED PILOT EXECUTION

QUESTION 27

How do people solve this today?

They may use NGO systems, messaging groups, forms, spreadsheets or separate platforms. The pilot will test whether a connected workflow adds enough value.

STRATEGIC DEFENSE

QUESTION 28

Why would users choose ACTA?

ACTA aims to make it easier to discover campaigns, coordinate participation and follow progress in one workflow. Pilot results must establish its value.

STRATEGIC DEFENSE

QUESTION 29

How large is your market?

I need to estimate the addressable market using credible counts of institutions and NGOs, realistic adoption assumptions and the segment ACTA can initially serve.

STRATEGIC DEFENSE

QUESTION 30

How did you calculate market size?

I will explain the sources and assumptions behind any estimate. Unvalidated figures will be labelled estimates, not facts.

STRATEGIC DEFENSE

QUESTION 31

Who uses ACTA and who pays?

Users may include volunteers, students and NGO teams. Potential payers include NGOs or institutions purchasing software and services; this still needs validation.

STRATEGIC DEFENSE

QUESTION 32

Will NGOs pay for software?

That is an assumption to test through interviews, pilot offers and discussions about the value of reporting and campaign management.

STRATEGIC DEFENSE

QUESTION 33

Why pay when free tools exist?

ACTA must demonstrate that its coordinated workflow, reporting and evidence management save effort or improve outcomes enough to justify the price.

STRATEGIC DEFENSE

QUESTION 34

How will you prove impact?

I will track measurable outputs and outcomes, such as completed activities, accepted evidence, participation, milestones and partner feedback.

STRATEGIC DEFENSE

QUESTION 35

Have you changed the product based on feedback?

I will describe specific feedback and the product changes it caused, without claiming a change was user-driven unless I can explain the evidence.

PROPOSED ARCHITECTURE (PENDING REVIEW)

4. Product, Technology and Demo

QUESTION 36

Can you demonstrate ACTA?

I will demonstrate the current prototype, focus on a short core workflow and keep a recording or screenshots ready in case of connectivity problems.

LIVE PROTOTYPE STATUS

QUESTION 37

Which features currently work?

I will list only features tested and working in the current build.

LIVE PROTOTYPE STATUS

QUESTION 38

Which features are planned?

I will label advanced verification, AI assistance, CSR matching or government-facing tools as planned unless they are implemented.

LIVE PROTOTYPE STATUS

QUESTION 39

What is your technology stack?

The prototype has used React/Next.js, Node/Express, MongoDB, JWT and Vercel/Render. I will confirm the exact stack in the current codebase before presenting.

LIVE PROTOTYPE STATUS

40. Explain your architecture.

I will explain how the frontend communicates with the backend, how the backend accesses the database, how authentication works and which external services are integrated.

QUESTION 41

How do authentication and permissions work?

I will explain the current implementation of login, roles and access control and avoid claiming complete role separation unless verified.

STRATEGIC DEFENSE

QUESTION 42

How will NGOs be verified?

The proposed process can include checking registration and organizational documents, validating authorized contacts and reviewing campaign details.

STRATEGIC DEFENSE

QUESTION 43

How is a campaign created?

I will demonstrate the actual campaign-creation workflow if implemented. Otherwise, I will describe it as planned.

STRATEGIC DEFENSE

QUESTION 44

How is proof submitted?

The proposed workflow allows campaign teams to submit supporting evidence, such as photos, videos, timestamps or reports, depending on the campaign.

STRATEGIC DEFENSE

QUESTION 45

Who approves evidence?

An authorized reviewer should evaluate submissions against defined criteria. The roles and workflow need to be implemented and documented.

STRATEGIC DEFENSE

QUESTION 46

How will you detect fake evidence?

Potential controls include reviewer checks, timestamps, duplicate detection and contextual verification. They reduce risk but cannot guarantee all fraud is detected.

STRATEGIC DEFENSE

QUESTION 47

Can an NGO appeal a rejection?

A fair system should explain rejection reasons and allow correction or review under a documented process. I will identify whether this is implemented or planned.

STRATEGIC DEFENSE

QUESTION 48

What if the server goes down?

I will explain current hosting and backup arrangements and establish monitoring, recovery and backup procedures appropriate to the pilot.

STRATEGIC DEFENSE

QUESTION 49

How will you protect data?

I will minimize collected data, restrict access, protect credentials, use secure transport and storage, and establish backup, retention and incident-response practices.

STRATEGIC DEFENSE

QUESTION 50

Does it work on mobile?

I will test the current responsive experience on common mobile devices and present the actual result.

LIVE PROTOTYPE STATUS

QUESTION 51

Can it scale to 100,000 users?

The prototype is not proof of that scale. I would assess load, database performance, caching, monitoring and infrastructure before claiming readiness.

STRATEGIC DEFENSE

QUESTION 52

What does hosting cost?

I will provide actual current hosting and service costs where available and label future scaling costs as estimates.

STRATEGIC DEFENSE

QUESTION 53

Has there been an independent security review?

I will answer honestly. If no review has taken place, I will list it as a pre-launch task.

STRATEGIC DEFENSE

QUESTION 54

What if the demo fails?

I will have a short recording, screenshots, a stable demo account and a simple explanation of the core workflow ready.

LIVE PROTOTYPE STATUS

5. Institutional Guilds and Gamification

QUESTION 55

What is an Institutional Guild?

A proposed community structure through which a college or institution can organize participants and coordinate social-impact activities.

STRATEGIC DEFENSE

QUESTION 56

How is a Guild different from a college club?

A Guild is intended to connect participation to campaigns, verified activities and measurable progress. Its added value must be demonstrated in a pilot.

STRATEGIC DEFENSE

QUESTION 57

Why would colleges create Guilds?

Guilds could help institutions organize student participation, coordinate NGO campaigns and track verified activities.

STRATEGIC DEFENSE

QUESTION 58

Why would students stay active?

The platform aims to combine meaningful activities, visible progress, recognition and community participation. Retention must be measured.

STRATEGIC DEFENSE

QUESTION 59

How does gamification support impact?

Points and badges should recognize verified participation and meaningful contributions, not replace the real-world objective.

STRATEGIC DEFENSE

QUESTION 60

What stops people gaming the points system?

Possible controls include evidence requirements, review, duplicate checks, activity limits and audit logs. No system can promise zero abuse.

STRATEGIC DEFENSE

QUESTION 61

How will Guild competitions be fair?

Use transparent scoring rules, comparable activity categories and review processes, and avoid rewarding quantity without considering quality.

STRATEGIC DEFENSE

QUESTION 62

Will participants receive certificates?

Certificates could be offered if the platform and participating institution agree on criteria and verification. I will not promise institutional recognition without approval.

STRATEGIC DEFENSE

QUESTION 63

What if someone does not submit proof?

The activity should remain unverified until the required evidence is submitted and reviewed, according to campaign rules.

STRATEGIC DEFENSE

QUESTION 64

Can Guilds participate without donations?

Yes. The intended platform includes non-financial participation such as volunteering, skills and verified activities.

STRATEGIC DEFENSE

QUESTION 65

How will you include people who cannot donate?

ACTA is intended to recognize time, skills and participation as well as financial contributions.

PROPOSED ARCHITECTURE (PENDING REVIEW)

6. NGO and Campaign Operations

QUESTION 66

Who will onboard NGOs?

Initially, the founding team would approach suitable organizations and guide them through onboarding and verification.

STRATEGIC DEFENSE

QUESTION 67

How will you verify an NGO?

The proposed process includes checking relevant registration documents, authorized contacts, organizational details and campaign information.

STRATEGIC DEFENSE

QUESTION 68

What if an NGO misuses funds?

The NGO is responsible for its fund use under the applicable arrangements. ACTA should maintain transparent records, escalation procedures and partner agreements, without claiming the platform alone can prevent misuse.

STRATEGIC DEFENSE

QUESTION 69

What if an NGO does not finish a campaign?

The campaign should be marked delayed or incomplete, with an explanation and updated evidence. Donor remedies depend on campaign terms and applicable rules.

STRATEGIC DEFENSE

QUESTION 70

Who sets milestones?

The NGO and campaign team should define realistic milestones, with ACTA supporting documentation and tracking.

STRATEGIC DEFENSE

QUESTION 71

How will donors see utilization?

The proposed system can show campaign status, supporting evidence and available utilization records, subject to privacy and verification limits.

STRATEGIC DEFENSE

QUESTION 72

What if expected impact is not achieved?

The result should be reported transparently, including what was completed, what was not achieved and why, where known.

STRATEGIC DEFENSE

QUESTION 73

Who resolves disputes?

The NGO agreement and platform terms should define responsibilities, complaint handling and escalation routes.

STRATEGIC DEFENSE

QUESTION 74

What if an NGO does not pay ACTA?

The service agreement should define invoices, payment terms, renewal and suspension. ACTA should not take unauthorized deductions from donations.

STRATEGIC DEFENSE

QUESTION 75

Can an NGO manage its own campaign?

That is part of the intended product direction. I will explain the current self-service capabilities accurately.

STRATEGIC DEFENSE

QUESTION 76

What if NGO staff are not tech-savvy?

Start with simple onboarding, templates, training and support, and test whether staff can complete the workflow.

STRATEGIC DEFENSE

QUESTION 77

What about weak internet in rural areas?

The pilot should test mobile usability and low-bandwidth performance. Offline support should only be promised if implemented.

STRATEGIC DEFENSE

QUESTION 78

Will there be written NGO agreements?

Written agreements should define services, fees, campaign responsibilities, evidence, data handling and dispute processes before formal operation.

STRATEGIC DEFENSE

QUESTION 79

What happens to records if an NGO leaves?

The platform should define data access, export, retention and deletion rules in the agreement and privacy policy.

STRATEGIC DEFENSE

7. Donations, 5% Service Fee and Legal Questions

QUESTION 80

Does ACTA collect donations?

Under the proposed model, donations are intended to go directly to the eligible NGO's payment account. ACTA provides technology services. The exact payment flow needs provider and legal review.

STRATEGIC DEFENSE

QUESTION 81

What is the 5% fee for?

The proposed fee compensates ACTA for agreed platform, campaign-management and reporting services. The service scope and fee must be documented.

PROPOSED ARCHITECTURE (PENDING REVIEW)

QUESTION 82

Who pays the 5% fee?

The proposed flow allocates 5% of the donation amount as ACTA's service fee and 95% to the NGO. The final payer, accounting and settlement treatment must be confirmed.

PROPOSED ARCHITECTURE (PENDING REVIEW)

QUESTION 83

Will donors see the fee before paying?

The fee and allocation should be clearly disclosed before the donor confirms the transaction.

PROPOSED ARCHITECTURE (PENDING REVIEW)

QUESTION 84

Why use escrow?

The proposed idea is to use a provider-supported settlement mechanism if appropriate. Whether escrow is necessary or permitted depends on the actual flow and provider requirements.

PROPOSED ARCHITECTURE (PENDING REVIEW)

QUESTION 85

Does the provider support automatic 5%/95% settlement?

I need written confirmation from the provider. I will not claim the split is approved until the exact arrangement is confirmed.

STRATEGIC DEFENSE

QUESTION 86

Is ACTA a payment aggregator, gateway or SaaS provider?

ACTA is intended primarily as a social-impact technology service. Its regulatory classification depends on actual payment activities and must be confirmed by a qualified advisor.

STRATEGIC DEFENSE

QUESTION 87

What if split settlement is not supported?

I will redesign the billing and settlement model with the provider and legal advisor rather than implement an unapproved workaround.

PROPOSED ARCHITECTURE (PENDING REVIEW)

QUESTION 88

Who pays payment processing fees?

This must be stated in the provider agreement and disclosed where relevant, and included in campaign financial calculations.

PROPOSED ARCHITECTURE (PENDING REVIEW)

QUESTION 89

What happens to ACTA's fee after a refund?

The refund and fee-reversal policy must be agreed with the provider and documented in NGO and donor terms.

PROPOSED ARCHITECTURE (PENDING REVIEW)

QUESTION 90

Who bears chargebacks or fraudulent payment losses?

The payment-provider contract and applicable rules determine responsibility. ACTA must clarify this before live transactions.

STRATEGIC DEFENSE

QUESTION 91

Will ACTA ever control donor funds?

The intended design is to avoid holding or pooling donations and have donations go directly to the NGO. The actual arrangement must ensure the flow matches that intention.

STRATEGIC DEFENSE

QUESTION 92

Whose account receives the donation?

Under the proposed model, the eligible NGO's appropriately configured payment account receives the donation.

STRATEGIC DEFENSE

QUESTION 93

How will the NGO reconcile settlement?

The system should reconcile payment IDs, gross donations, fees, provider charges, refunds and net settlement against provider reports.

STRATEGIC DEFENSE

QUESTION 94

Is the NGO's 10% general-use allocation automatically legal?

No universal assumption should be made. It depends on donor restrictions, campaign terms, the NGO's legal and tax obligations and applicable requirements.

PROPOSED ARCHITECTURE (PENDING REVIEW)

QUESTION 95

Will donors know how the 10% is used?

Campaign terms should clearly disclose the proposed allocation and what counts as permitted administrative or general use.

STRATEGIC DEFENSE

QUESTION 96

Will every campaign use the same 10% allocation?

This policy must be defined transparently and checked against each campaign's restrictions and NGO obligations.

STRATEGIC DEFENSE

QUESTION 97

What if a donor restricts the donation to a specific purpose?

The restriction must be respected. Funds should not be allocated contrary to donor conditions or applicable rules.

STRATEGIC DEFENSE

QUESTION 98

Will ACTA need GST registration or charge GST?

This depends on business structure, turnover and applicable tax rules. A tax professional should confirm registration and invoicing requirements.

PROPOSED ARCHITECTURE (PENDING REVIEW)

QUESTION 99

Who issues the donation receipt?

The recipient NGO should handle the donation receipt under the agreed process. ACTA's service invoice is separate.

STRATEGIC DEFENSE

QUESTION 100

Will the donation qualify for a tax deduction?

That is not automatic. Eligibility depends on the recipient's status, the donation and applicable requirements. ACTA should not promise tax benefits without confirmation.

PROPOSED ARCHITECTURE (PENDING REVIEW)

QUESTION 101

What registrations or approvals does the NGO need?

This depends on the organization and campaign. ACTA should verify relevant documents and obtain professional guidance.

STRATEGIC DEFENSE

QUESTION 102

What if foreign donations are involved?

Foreign contributions can trigger additional requirements. The pilot should not assume domestic and foreign donations follow the same process.

STRATEGIC DEFENSE

QUESTION 103

Does ACTA need authorization to handle funds?

The intended model is to provide technology and avoid holding donations, but obligations depend on the actual payment flow and require qualified review.

STRATEGIC DEFENSE

QUESTION 104

How will ACTA account for service-fee revenue?

ACTA should maintain separate service invoices, payment-provider settlement records, bookkeeping and tax compliance as advised by an accountant.

PROPOSED ARCHITECTURE (PENDING REVIEW)

8. Competitors and Differentiation

QUESTION 105

Who are ACTA's competitors?

Adjacent platforms include volunteer-engagement, NGO-management, donation and civic-participation services. I will compare their actual features rather than claim there are no competitors.

STRATEGIC DEFENSE

QUESTION 106

How is ACTA different from MY Bharat or other platforms?

ACTA's intended focus is its connected workflow combining challenge discovery, Institutional Guilds, participation and transparent campaign tracking. A current feature-by-feature comparison is needed.

STRATEGIC DEFENSE

QUESTION 107

Why not use WhatsApp, forms and spreadsheets?

ACTA must prove that an integrated workflow reduces coordination effort, improves records or increases verified participation enough to justify switching.

STRATEGIC DEFENSE

QUESTION 108

Does every ACTA feature already exist elsewhere?

Individual features may exist elsewhere. The hypothesis is that connecting them could be useful; this needs competitive analysis and pilot validation.

LIVE PROTOTYPE STATUS

QUESTION 109

What if competitors copy ACTA?

The response is better execution, trusted partner relationships, reliable operations, strong user experience and evidence of outcomes.

STRATEGIC DEFENSE

QUESTION 110

What is ACTA's defensible advantage?

At this stage, the potential advantage is the connected workflow and future partner network. A durable advantage must be earned through execution and trust.

STRATEGIC DEFENSE

QUESTION 111

Have you built a competitor comparison?

I should prepare a current comparison of target users, campaigns, Guilds, evidence verification, reporting, payment flow and pricing.

LIVE PROTOTYPE STATUS

QUESTION 112

What is ACTA's USP in one sentence?

ACTA aims to connect societal challenges, institutional participation, NGO campaigns and transparent impact tracking in one coordinated workflow.

STRATEGIC DEFENSE

QUESTION 113

Is ACTA India's first or only platform of its kind?

I will not claim first or only without strong evidence. I will explain the workflow I am building and how it compares with alternatives.

STRATEGIC DEFENSE

QUESTION 114

Are you targeting everyone?

No. The initial focus should be narrow—for example, one institution and one NGO campaign—before expanding.

STRATEGIC DEFENSE

9. Business Model and Financial Sustainability

QUESTION 115

Who is the first paying customer?

The first likely paying customer could be an NGO or institution that values campaign-management and reporting services. This needs validation.

STRATEGIC DEFENSE

QUESTION 116

What is the primary revenue source?

The initial options are a fixed service fee or subscription. The 5% donation-linked fee is proposed and requires provider and compliance confirmation.

STRATEGIC DEFENSE

QUESTION 117

What if donation volume is low?

A subscription or fixed service fee could reduce dependence on donation volume, but willingness to pay must be validated.

STRATEGIC DEFENSE

QUESTION 118

Will every NGO pay the same fee?

Pricing could depend on service scope and partner needs, but tiers must be transparent and tested.

PROPOSED ARCHITECTURE (PENDING REVIEW)

QUESTION 119

How much revenue would ₹1 lakh in donations generate at 5%?

₹5,000 gross fee revenue if the full ₹1 lakh is eligible for a 5% fee. It is not profit; costs, refunds and applicable taxes are separate.

STRATEGIC DEFENSE

QUESTION 120

How much would ₹10 lakh monthly donation volume generate at 5%?

₹50,000 gross fee revenue under the same assumption. This is a scenario, not a forecast.

STRATEGIC DEFENSE

QUESTION 121

What are the operating costs?

I need to calculate hosting, payment processing, support, verification, development, administration and applicable compliance costs.

STRATEGIC DEFENSE

QUESTION 122

What is customer acquisition cost?

I need pilot data on outreach time, travel, onboarding effort and marketing costs before claiming a reliable cost.

STRATEGIC DEFENSE

QUESTION 123

What does onboarding one NGO cost?

I will measure staff time, training, verification and support effort during the pilot.

STRATEGIC DEFENSE

QUESTION 124

Can ACTA become profitable?

Potentially, but profitability depends on pricing, paying customers, retention, service costs and scale. Those assumptions need validation.

STRATEGIC DEFENSE

QUESTION 125

How will free users become paying customers?

I will demonstrate value through a pilot and offer paid services to partners that need ongoing campaign management, coordination or reporting.

STRATEGIC DEFENSE

QUESTION 126

What if NGOs will not pay?

I will test institutional subscriptions, fixed service contracts or sponsor-funded software services rather than assume the original model must work.

STRATEGIC DEFENSE

QUESTION 127

Why would CSR partners pay?

Potentially for campaign coordination, reporting or evidence workflows, but this requires customer discovery and must not be presented as existing demand or partnership.

STRATEGIC DEFENSE

QUESTION 128

Do you need funding?

My immediate priority is to validate the model and run a focused pilot. Any funding request should be tied to a specific budget and milestones.

STRATEGIC DEFENSE

QUESTION 129

Can you continue without incubation?

I can continue refining the prototype and validating the problem, while incubation could help with mentoring, partner introductions and structured pilot access.

STRATEGIC DEFENSE

10. AI, CSR and Future Expansion

QUESTION 130

What exactly will AI do?

AI may assist with challenge categorization, personalized recommendations or evidence-review support. I will distinguish planned AI features from implemented functionality.

STRATEGIC DEFENSE

QUESTION 131

Will AI automatically approve proof?

It should not be treated as a perfect or sole authority. Important verification decisions should have defined criteria and human oversight.

STRATEGIC DEFENSE

QUESTION 132

Who is responsible if AI makes a mistake?

The platform needs a documented review, correction and appeal process, with responsibilities defined in its terms. AI should not be presented as infallible.

STRATEGIC DEFENSE

QUESTION 133

Is ACTA useful without AI?

Yes. The core value proposition is coordination and impact tracking. AI is an optional enhancement, not a prerequisite for testing the basic workflow.

STRATEGIC DEFENSE

QUESTION 134

How would CSR matching work?

It is a proposed future model in which eligible sponsors may support campaigns or milestones under agreed criteria. Mechanics and compliance need to be designed with partners.

STRATEGIC DEFENSE

QUESTION 135

Why would a CSR company trust ACTA?

Trust would depend on credible NGO partners, reliable evidence, clear reporting, governance and demonstrated pilot results.

STRATEGIC DEFENSE

QUESTION 136

Is ACTA partnered with the government?

I will not claim a government partnership unless a formal relationship exists. A public-authority console is a proposed roadmap feature.

STRATEGIC DEFENSE

QUESTION 137

Why include a government console in the roadmap?

It could eventually support coordination and reporting for public-sector stakeholders, but the initial pilot does not depend on it.

STRATEGIC DEFENSE

QUESTION 138

Will CSR funds be tracked separately?

Separate accounting and clear reporting would be important if CSR sponsorship is introduced, subject to partner requirements.

STRATEGIC DEFENSE

QUESTION 139

Will personalization use personal data?

Only necessary data should be used, with clear purpose, access controls and appropriate consent or other lawful basis as required.

STRATEGIC DEFENSE

QUESTION 140

How will you handle privacy?

I will minimize data collection, document purposes and retention, restrict access, protect information and follow applicable privacy requirements.

STRATEGIC DEFENSE

11. Tough Questions and Pressure Test

QUESTION 141

What would users lose if ACTA shut down tomorrow?

At this stage, the value depends on the pilot. The goal is to create reliable records of participation, campaign progress and evidence that partners find useful.

STRATEGIC DEFENSE

QUESTION 142

Why not use WhatsApp directly?

WhatsApp can coordinate conversations, but ACTA aims to add structured campaign workflows, evidence review and progress reporting. The pilot must show these additions solve a real problem.

STRATEGIC DEFENSE

QUESTION 143

Why incubate ACTA when traction is limited?

I have a prototype and a defined hypothesis, but still need validation. Incubation could help test the model with real partners and measurable milestones.

STRATEGIC DEFENSE

QUESTION 144

Are you building a product or collecting features?

The product should be organized around one core workflow. I will prioritize the pilot's essential features and defer advanced features.

LIVE PROTOTYPE STATUS

QUESTION 145

What is the MVP?

A focused version that lets a partner create a campaign, participants join and complete activities, evidence gets reviewed and progress is visible.

STRATEGIC DEFENSE

QUESTION 146

What can you deliver in 30 days?

A realistic target is a defined pilot workflow, partner discovery, a tested demo and a measurement plan. External commitments depend on actual agreements.

STRATEGIC DEFENSE

QUESTION 147

What will you deliberately not build now?

I would defer complex AI verification, government-facing tools, large-scale CSR matching and advanced gamification until the core pilot works.

STRATEGIC DEFENSE

QUESTION 148

What if an NGO rejects the 5% fee?

I will understand the objection and test fixed service fees, subscriptions or sponsor-funded software services.

PROPOSED ARCHITECTURE (PENDING REVIEW)

QUESTION 149

What if the campaign succeeds but ACTA earns nothing?

The pilot can still validate the workflow, but long-term sustainability requires a separately validated paying customer and pricing model.

STRATEGIC DEFENSE

QUESTION 150

What would show that the approach is not working?

Repeated low participation, no partner willingness to continue, high verification costs, weak evidence quality or no willingness to pay would indicate a need to revise the model.

STRATEGIC DEFENSE

QUESTION 151

How will you test your biggest assumption?

I will run a small pilot and measure whether users complete activities, partners find the workflow useful and a potential customer is willing to pay.

STRATEGIC DEFENSE

QUESTION 152

What if only 10 users participate?

I would interview participants and non-participants, examine onboarding friction and partner value, and improve the workflow before scaling.

STRATEGIC DEFENSE

QUESTION 153

What impact metrics will you use?

Metrics may include active participants, completed activities, accepted evidence, campaign milestones, repeat participation and partner satisfaction.

STRATEGIC DEFENSE

QUESTION 154

How will you evaluate failure?

I will define success criteria in advance, review the data honestly and change the product or target segment if the evidence does not support the current assumptions.

STRATEGIC DEFENSE

QUESTION 155

Do you need money, users or institutional access?

My immediate priority is partner access and mentorship to validate a focused pilot. Any funding request should be tied to a specific budget and milestones.

PROPOSED ARCHITECTURE (PENDING REVIEW)

QUESTION 156

Where do you see ACTA in three years?

The goal is to build a sustainable platform with validated institutional and NGO workflows, repeat usage and measurable outcomes. Scale will depend on pilot results.

STRATEGIC DEFENSE

QUESTION 157

Why is your team suitable?

I will explain the team's actual skills, product work and relevant experience, and identify where we need mentors or additional expertise.

STRATEGIC DEFENSE

QUESTION 158

What is the weakest part of your prototype?

I will honestly identify the largest technical or operational gap, explain its impact and state how I plan to address it.

LIVE PROTOTYPE STATUS

QUESTION 159

Has the architecture been independently reviewed?

I will state whether a review has occurred. If not, an independent security and architecture review is a future task.

STRATEGIC DEFENSE

QUESTION 160

What should we expect in the first 90 days of incubation?

A focused pilot plan, partner discovery, tested core workflow, measurable usage and evidence of partner feedback and willingness to continue.

GROUNDED PILOT EXECUTION

12. Practical Problems and Responses

NGO partners are difficult to secure

Start with a narrow use case, personalize outreach and focus on one realistic pilot partner.

Users register but do not return

Simplify onboarding, offer meaningful activities and measure repeat participation.

NGOs are unwilling to pay

Demonstrate value through a pilot and test willingness to pay before locking the pricing model.

Payment split is not approved

Confirm the exact flow with the provider and redesign the billing arrangement with qualified advice.

Fake evidence is submitted

Use reviewer workflows, timestamps, duplicate checks and audit trails; do not claim fraud can be eliminated completely.

Donation and campaign records do not match

Reconcile provider transaction IDs, gross amounts, fees, refunds and net settlements.

The demo or server fails

Prepare a tested demo account, recording, screenshots and a concise offline explanation.

Team disagreements occur

Document roles, ownership, weekly goals and decision-making rules.

The product scope keeps expanding

Start with one institution, one NGO and one campaign; defer advanced features.

Personal data is exposed

Minimize collection, restrict access, secure storage and backups, and prepare an incident-response process.

Campaign outcomes are not achieved

Report results transparently, explain what was completed and document lessons learned.

A competitor launches similar features

Improve execution, partner relationships, operations, usability and demonstrated outcomes.

The incubator does not provide funding

Use mentorship, partner introductions and feedback where available, and explore other funding options separately.

Users think ACTA is only a donation app

Demonstrate volunteering, institutional participation, evidence and impact tracking—not just donations.

13. Pitch Readiness Checklist

Founder story

Prepare a two-minute explanation of how the idea began with volunteer recruitment.

Problem and solution

Explain the problem and ACTA's proposed solution in one sentence each.

Prototype

Test every feature you plan to demonstrate.

Feature status

Prepare a list separating implemented, partially implemented and planned features.

Revenue model

Explain the proposed 5% service fee and any subscription alternative.

Payment flow

Show the proposed NGO-direct donation flow and label it as subject to provider and compliance confirmation.

Pilot

Prepare a realistic plan for one institution, one NGO and one campaign.

Competition

Prepare a current feature-by-feature comparison without unsupported first/only claims.

Validation

Document actual outreach, responses, feedback and partner commitments separately.

Incubation ask

State the specific mentorship, partner introductions, validation and compliance support you want.

Demo backup

Keep a screen recording, screenshots and a tested demo account ready.

Honesty

Do not claim revenue, active users, formal partnerships, approvals or implemented features unless verified.

Final Preparation Advice

Do not memorize every answer word for word. Prioritize the problem, differentiation, prototype, revenue model, payment compliance and pilot plan. Be candid about gaps and explain how you will test assumptions.
